

Capabilities Overview

Delivering exceptional service to ensure there is no alternative to your success.

KeenLogic is an IT Services company that builds and deploys highly trained, experienced teams of technical personnel on-site to directly support project goals in accordance with their customer's specific mission criteria.

KeenLogic operates under the values instilled in its founder, and CEO Matthew Totsch during his time in the Army which is why he and his team will always put the mission first. It is these core values such as discipline, integrity, respect and a loyal focus on customer objectives that allow them to take a superior approach to the project.

KeenLogic's technical expertise lies not only within its employees, but also within its proven ability to build and deploy custom teams that directly reflect the capability necessary to meet the needs of the customer, as well as their environment. Their technical personnel hold certifications ranging from CCNP for our Network Engineers, to CISSP for their Information Assurance and Security specialists, which allows them to bring the greatest aptitude to the table while instilling confidence and peace of mind in their customers.

The KeenLogic team provides IT and Broadband Services in support of both Government and commercial technical and modernization initiatives worldwide.

Quality People & Performance

Since its inception, KeenLogic has formed teaming relationships with industry leaders in support of various large-scale Government projects by demonstrating strong technical expertise, mission focus, and agility. They've earned exceptional performance reviews as they continue to prove themselves as a qualified and reliable small business teaming partner. KeenLogic's current on-site Government sub-contracts surround Network Engineering, Software Development & Testing, Information Assurance, and System Administration with Large Business Groups and Government Agencies.
